Facilities Management.

Facilities Management

Critical Infrastructures FM.

Our highly efficient Facilities Management team provides an extensive range of services targeted at mission critical solutions.

In partnership with the highly trained Critical Infrastructures team, VAGT can develop bespoke and tailored Facilities Management packages to provide the best possible services based on each client's needs and budget.

We recognise the importance of business continuity and keeping your critical infrastructure fully operational and therefore work on a 24/7 basis to ensure all of our clients receive complete technical cover and care.

Our team of highly qualified FM engineers are able to provide this and support any business operation or environment.

Facilities Management

VAGT FMS are able to develop bespoke and tailored Facilities Management packages.

Facilities Management

Enterprise Services FM .

Our highly trained team of directly employed engineers are on call 24/7 to ensure minimal impact on your business operations.

Our team deliver planned and reactive maintenance across a variety of power and data environments. All installations are subject to wear and tear, corrosion, excessive loading and other environmental issues. Any of these can lead to major infrastructure breakdowns if they are not observed and rectified at regular intervals.

Our Facilities Management team can provide a bespoke service personalised to your company's individual needs. We are skilled in working within a wide range of sectors including retail, office space, educational facilities and medical environments. This demonstrates our broad experience and capabilities.
